

The Keystone Experience

As an independent test lab, we pride ourselves on a customer-first philosophy that NRTL labs cannot always provide. Our unique consultative approach results in a win-win for your compliance effort.

A Philosophy of Partnership

- ▶ Expert Project Management
- ▶ Economical Pre-Compliance Testing
- ▶ Design Review Resources
- ▶ Compliant Test Results
- ▶ Expedited Test Reports
- ▶ Full Certification Services
- ▶ Short Lead Times to Test
- ▶ Common-Sense Pricing
- ▶ Local Decision Making

Accreditations & Scope

Keystone Compliance is accredited to ISO-17025 through A2LA and is also an ISTA-certified lab. Our scope covers a vast array of commercial and military standards across a wide range of industries.

Your Key to a Successful Compliance Program

WIRELESS CERTIFICATION

Keystone Compliance is accredited by A2LA to perform wireless and RF testing services. This provides unparalleled turn-key solutions that meet all of the compliance requirements for the USA, Canada, EU, and rest of world wireless markets. Our expert test engineers have you covered in the lab and our program managers will handle the documentation.

EMC TESTING

Our industry leading capabilities include shielding effectiveness, lightning & surge, electrostatic discharge, EMI site surveys and EMP testing. Capabilities include radiated immunity up to 200 V/m from 10 kHz to 40 GHz, radiated emissions up to 40 GHz, surge up to 200kV/100kA and ESD testing to 30 kV and higher.

ENVIRONMENTAL TESTING

The climatics and dynamics labs can cover a full MIL-810 test program including acceleration, altitude, blowing rain, corrosion, drop, fungus, humidity, icing & freezing rain, immersion, ingress protection, reliability, salt-fog, shock, solar radiation, temperature, thermal shock and vibration testing.

PACKAGE TESTING

As an ISTA and Amazon certified test lab, Keystone can meet nearly every package testing need. Our capabilities include testing to nearly every ISTA, ASTM, Amazon, IEC, General Motors and Wal-Mart test standard. We are experts of chain package testing and temperature validations including ISTA 7D & 7E.

PRODUCT SAFETY CERTIFICATION

One-stop testing and certification services for the USA, Canada, European market and global market access. We specialize in third-party certification of electrical products as mandated by law and offer several certification marks and approval labels that are equally recognized by the Authority Having Jurisdiction.

INGRESS PROTECTION

Regardless of the size of the test device, Keystone Compliance has the equipment and expertise to meet all ingress protection (IP Code) testing requirements. Our scope includes all ingress protection ratings including IP69K and accreditation to nearly every NEMA, MIL-STD, ASTM, ISO, EN and IEC test standard.

"Keystone performed consumer testing for us. Professional, courteous, and communication masters. We shopped around for two weeks before we landed on Keystone. Best pricing in industry. Fastest turnaround as well. Don't waste your time with the others."
