

KEYSTONE

PACKAGE TESTING

E-Commerce Package Testing

Keystone Package Testing continuously partners with hundreds of E-commerce manufacturers yearly to achieve expert ISO 17025 package testing certifications. Our comprehensive scope, large lab of test equipment, and an extensive focus on customer service makes us the go-to test lab for E-commerce and all package testing needs.

The Keystone Experience

We focus on the customer. Some of the benefits of our process include:

- Development of the perfect test plan
- Short lead times on scheduling
- Constant communication throughout
- Design guidance as needed
- Expedited report delivery
- Certification advocacy

Keystone complies to:

- Amazon SIOC
- Costco
- Home Depot
- HSN
- QVC
- Sam's Club
- TJX

Testing Capabilities

We are an ISO-17025 and ISTA-accredited test lab providing custom and specialized testing including:

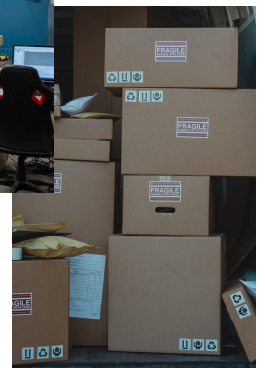

- Drop
- Vibration
- Distribution
- Seal strength
- Shock

Equipment Capabilities

Our large lab is full of test equipment including:

- Thermal chambers as large as 12' x 12'
- Thermal testing range from -70C to 180C
- Multiple large shakers and compression machines

"Keystone performed consumer testing for us. Professional, courteous, and communication masters. We shopped around for two weeks before we landed on Keystone. Best pricing in the industry. Fastest turnaround as well. Don't waste your time with the others." Google review from a client.
